24	x	x	x	x	x	CONTEXT	LEVEL	Country		
25	x	x	x	x	x	CONTEXT	LEVEL	County		
26	x	x	x			CONTEXT	LEVEL	Family		A family consists of all related persons within one household and defined by Hammel/Laslett household classification scheme. Conjugal family units (CFU) are formed in one of three ways: by a married couple without offspring, by a married couple with never-married offspring and/or never-married adopted/foster children, or by a lone parent with at least one never-married child. If there are more than two generations in a household, the CFU is formed from the youngest generation upwards. For further details on the construction of the CFU see E. A. Hammel and P. Laslett. (1974). Comparing household structure over time and between cultures. Comparative studies in Society and History 16(1): 73-109.
27		x	x	x		CONTEXT	LEVEL	Household		A household consists of all persons that live together at the same place during the same time.
28				x		CONTEXT	LEVEL	Ledger		Record-keeping area, for a specific time, comparing one or more city properties/houses, normally part of a city block

246	x	x	x	x	x	INDIVIDUAL	OCCUPATION_HISCO_STATUS_PART_3	DEFINITION		HISCO_code for status present in (standardized) occupational title like master, owner, journeyman, student, baron (third title with the same timestamp).
247	x	x	x	x	x	INDIVIDUAL	OCCUPATION_HISCO_STATUS_PART_4	DEFINITION		HISCO_code for status present in (standardized) occupational title like master, owner, journeyman, student, baron (fourth title with the same timestamp).
248	x		x	x	x	INDIVIDUAL	OCCUPATION_HISCO_STATUS_PART_5	DEFINITION		HISCO_code for status present in (standardized) occupational title like master, owner, journeyman, student, baron (fifth title with the same timestamp).
249	x		x	x		INDIVIDUAL	OCCUPATION_HISCO_STATUS_PART_6	DEFINITION		HISCO_code for status present in (standardized) occupational title like master, owner, journeyman, student, baron (sixth title with the same timestamp).
250	x	x	x	x	x	INDIVIDUAL	OCCUPATION_STANDARD_PART_1	DEFINITION		Standardized occupational title (all appearances, including repeating titles with the same value)
251	x	x	x	x	x	INDIVIDUAL	OCCUPATION_STANDARD_PART_2	DEFINITION		Standardized occupational title (all appearances, including repeating titles with the same value) (second title with the same timestamp).
252	x	x	x	x	x	INDIVIDUAL	OCCUPATION_STANDARD_PART_3	DEFINITION		Standardized occupational title (all appearances, including repeating titles with the same value) (third title with the same timestamp).
253	x	x	x	x	x	INDIVIDUAL	OCCUPATION_STANDARD_PART_4	DEFINITION		Standardized occupational title (all appearances, including repeating titles with the same value) (fourth title with the same timestamp).
254	x		x	x	x	INDIVIDUAL	OCCUPATION_STANDARD_PART_5	DEFINITION		Standardized occupational title (all appearances, including repeating titles with the same value) (fifth title with the same timestamp).
255	x		x	x		INDIVIDUAL	OCCUPATION_STANDARD_PART_6	DEFINITION		Standardized occupational title (all appearances, including repeating titles with the same value) (sixth title with the same timestamp).
256			x			INDIVIDUAL	PERSON_IN_LABOUR_FORCE	DEFINITION		Person in labour force
257			x			INDIVIDUAL	PERSON_IS_ABSENT	DEFINITION		Constructed variable, if there is any notation in the census of the person being absent then this is set to one, otherwise it is set to zero.
258			x			INDIVIDUAL	REASON_FOR_BEING_ABSENT	DEFINITION		Notations made in the census regarding the person being absent.
259				x		INDIVIDUAL	RENT	DEFINITION		Total rent (Calculated) for housing and business premises
260				x		INDIVIDUAL	ROTEMAN_ID	DEFINITION		Unique ID for each record, built from ledger no., page and row
261	x	x	x	x	x	INDIVIDUAL	SEX	DEFINITION		Sex of individual
262	x	x	x	x	x	INDIVIDUAL	SEX	Female		
263	x	x	x	x	x	INDIVIDUAL	SEX	Male		
264	x	x	x	x	x	INDIVIDUAL	SEX	Unknown		
265	x	x		x		INDIVIDUAL	START_OBSERVATION	Arrival		Observation started because of an arrival in a register (context)
266	x	x		x		INDIVIDUAL	START_OBSERVATION	Birth		Observation started because of birth

ID	DDB	SEDD	SWECENS	ROTEMANNEN	SDB	TYPE_T	TYPE	VALUE	VERSION	EXPLANATION
267	x	x		x		INDIVIDUAL	START_OBSERVATION	DEFINITION		Reason and date of the start of an observation
268	x	x		x		INDIVIDUAL	START_OBSERVATION	Start source		Observation started because an individual is present from the start in a register (without being present in other foregoing registers, included in the database)
269	x			x		INDIVIDUAL	START_OBSERVATION	Unknown		It is unknown how observation started.
270	x	x				INDIVIDUAL	STILLBIRTH_DATE	DEFINITION		Date of the event of a stillbirth, the value and further definition will be handled by the time stamp
271	x					INDIVIDUAL	STILLBIRTH_LOCATION	DEFINITION		Location of the event of the stillbirth. It is preferable to use a reference key to the context table and to enter the lowest level of the context
272			x			INDIVIDUAL	TITLE_AS_TRANSCRIBED	DEFINITION		Title as transcribed
273	x					INDIVIDUAL	VACCINATION	Crossed out vaccination annotation		The listing contains a crossed out V, which can be interpreted as the attempt at vaccination failed. Sometimes the crossed out V is followed by an O, which can stand for unvaccinated. An crossed out V can also mean that the vaccination note itself is incorrect. In both cases, the person should not be immune to smallpox.
274	x					INDIVIDUAL	VACCINATION	DEFINITION		Vaccination (smallpox).
275	x					INDIVIDUAL	VACCINATION	Infected and revaccinated		This shows that the person is first infected by natural smallpox and then vaccinated (and re-vaccinated). This is impossible and cannot reflect the situation correctly. If a person has had smallpox, the person cannot be successfully vaccinated. One interpretation may be that the notation indicates that vaccination has failed (due to previous natural infection). Another interpretation may be that the first notation about previous infection proved to be incorrect, after which vaccination (and revaccination) has taken place.
276	x					INDIVIDUAL	VACCINATION	Inoculated		The person is inoculated, not vaccinated.
277	x					INDIVIDUAL	VACCINATION	Inoculated or vaccinated or natural smallpox		The person is either vaccinated, inoculated or has had natural smallpox. The reason why the different types are not separated is due to limitations in the system that previously have been used for registration the sources.
278	x					INDIVIDUAL	VACCINATION	Natural smallpox		Means that the person has been infected with natural smallpox and is immune, therefore no vaccination or inoculation is needed.
279	x					INDIVIDUAL	VACCINATION	Natural smallpox (crossed out) and vaccinated		This code is similar to Natural smallpox and vaccinated, but the difference is that the annotation of natural smallpox has been crossed out. The reason may be that a person who previously had smallpox has been vaccinated. A more likely reason is that an earlier (and probably incorrect) notation of infection of natural smallpox has been changed to vaccinated, after vaccination has been made.
280	x					INDIVIDUAL	VACCINATION	Natural smallpox and vaccinated		The person has had natural smallpox and is at the same time vaccinated. This is not normally possible. For persons born in the 18th century, the listing indicates natural smallpox, while those born in the 19th century are more likely to be vaccinated. However, in both cases immunity to smallpox has been obtained, but for those vaccinated only temporarily (10-20 years). It may also be that the person has been vaccinated and, at least 20 years, later infected with natural smallpox. That is when the immunity has disappeared.
281	x					INDIVIDUAL	VACCINATION	Natural smallpox and vaccinated (crossed out)		The person has natural smallpox with the notation of vaccination crossed out. This may have meant that the person was vaccinated but later became infected. This may have been due to a long time between vaccination and infection (10-20 years), or alternatively that the vaccination did not work. It may also reflect that an attempt was made to vaccinate the person but failed, as the person had previously had natural smallpox.
282	x					INDIVIDUAL	VACCINATION	Not vaccinated, no natural smallpox		The person is neither vaccinated nor has had natural smallpox. The person is not immune to smallpox.
283	x					INDIVIDUAL	VACCINATION	Revaccinated and infected		This code indicates that the person is both vaccinated and re-vaccinated, as well as infected by natural smallpox. This is very unusual. One interpretation may be that this means that the person is simply vaccinated against smallpox, so that no natural infection has ever occurred. In all cases, this means that the person is immune to smallpox.
284	x					INDIVIDUAL	VACCINATION	Uninspected vaccination		The vaccinators were obliged to visit the vaccinated persons after the vaccination took place. The code indicates that the person has not been checked after the vaccination, which is why we cannot say with certainty whether they are immune or not.
285	x					INDIVIDUAL	VACCINATION	Uninterpretable vaccination annotation		The notation cannot be interpreted.
286	x					INDIVIDUAL	VACCINATION	Unknown if vaccination has been performed		The notation indicate that it is not possible to say with certainty whether a vaccination has been made or not.
287	x					INDIVIDUAL	VACCINATION	Vaccinated		The person is vaccinated.
288	x					INDIVIDUAL	VACCINATION	Vaccinated and revaccinated		The person has undergone more than one vaccination, i.e. is revaccinated. The code indicates the strongest degree of immunity.
289	x					INDIVIDUAL	VACCINATION	Vaccinated, not successful		This code indicates that the vaccination failed. People with this code were probably not immune to smallpox.
