89				x		OBSERVATION	ADDRESS	DEFINITION		Street and number
90	x	x		x		OBSERVATION	ARRIVAL_FROM	DEFINITION		Location or country from where a person enters the observation.
91	x	x		x		OBSERVATION	ARRIVAL_FROM_NAME	DEFINITION		Name of location or country from where a person enters the observation.
92				x		OBSERVATION	CITY_PROPERTY	DEFINITION		City block and property number
93	x	x	x	x	x	OBSERVATION	COUNTY	DEFINITION		County, code
94	x	x	x	x	x	OBSERVATION	COUNTY_NAME	DEFINITION		Name of county
95	x	x		x		OBSERVATION	DEPARTURE_TO	DEFINITION		Location or country to where a person leaves the observation.
96	x	x		x		OBSERVATION	DEPARTURE_TO_NAME	DEFINITION		Name of location or country to where a person leaves the observation.
97	x	x		x		OBSERVATION	END_OBSERVATION	Death		Observation ended because of death
98	x	x	x	x	x	OBSERVATION	END_OBSERVATION	DEFINITION		Reason and date of the end of an observation
99	x	x		x		OBSERVATION	END_OBSERVATION	Departure		Observation ended because of a departure out of a register
100	x	x		x		OBSERVATION	END_OBSERVATION	End source		Observation ended because an individual is present at the closing of a register (without being present in other succeeding registers, included in the database)
101	x	x	x	x	x	OBSERVATION	END_OBSERVATION	Unknown		It is unknown how observation ended.
102				x		OBSERVATION	LEDGER	DEFINITION		Record-keeping area, for a specific time, comparing one or more city properties/houses, normally part of a city block
103	x					OBSERVATION	LOCALITY	DEFINITION		Locality, code
104	x					OBSERVATION	LOCALITY_NAME	DEFINITION		Name of locality
105	x	x	x	x	x	OBSERVATION	OBSERVATION_NR	N		N= serial number for observation of individual(1, 2, 3 etc)
106	x	x	x	x	x	OBSERVATION	PARISH	DEFINITION		Parish, code
107	x	x	x	x	x	OBSERVATION	PARISH_NAME	DEFINITION		Name of parish
108			x			OBSERVATION	RESIDENCE_NAME	DEFINITION		Residence name
109	x	x		x		OBSERVATION	START_OBSERVATION	Arrival		Observation started because of an arrival in a register (context)
110	x	x		x		OBSERVATION	START_OBSERVATION	Birth		Observation started because of birth
111	x	x	x	x	x	OBSERVATION	START_OBSERVATION	DEFINITION		Reason and date of the start of an observation
112	x	x		x		OBSERVATION	START_OBSERVATION	Start source		Observation started because an individual is present from the start in a register (without being present in other foregoing registers, included in the database)
113	x	x	x	x	x	OBSERVATION	START_OBSERVATION	Unknown		It is unknown how observation started.
114			x			OBSERVATION	URBAN_RURAL	DEFINITION		Household is classified as rural or urban
115			x			OBSERVATION	URBAN_RURAL	Rural		The household is classified as rural
116			x			OBSERVATION	URBAN_RURAL	Urban		The household is classified as urban
117				x		OBSERVATION	WARD	DEFINITION		Administrative district number, 1-36, sometimes repeating
118	x	x	x	x	x	OCCUPATION	OCCUPATION_HISCO	DEFINITION		HISCO_code of standardized occupational title (all appearances, including repeating titles with the same value)
119	x		x	x	x	OCCUPATION	OCCUPATION_HISCO_PRODUCT	DEFINITION		HISCO_code for product
120	x	x	x	x	x	OCCUPATION	OCCUPATION_HISCO_RELATION	DEFINITION		HISCO_code for relationship with others, occupations or former occupations present in (standardized) occupational title like daughter (of farmer), retired (merchant).
121	x	x	x	x	x	OCCUPATION	OCCUPATION_HISCO_STATUS	DEFINITION		HISCO_code for status present in (standardized) occupational title like master, owner, journeyman, student, baron.
122	x	x	x	x	x	OCCUPATION	OCCUPATION_NR	N		N= number for individual's occupation, 1=part 1, 2=part 2 etc.
123	x	x	x	x	x	OCCUPATION	OCCUPATION_STANDARD	DEFINITION		Standardized occupational title (all appearances, including repeating titles with the same value)
124	x					PERSON	BAPTISM_DAY	DEFINITION		Date of baptism, day
125	x					PERSON	BAPTISM_LOCATION	DEFINITION		Location of the event of baptism.
126	x					PERSON	BAPTISM_LOCATION_NAME	DEFINITION		Name of baptism location
127	x					PERSON	BAPTISM_MONTH	DEFINITION		Date of baptism, month
128	x					PERSON	BAPTISM_YEAR	DEFINITION		Date of baptism, year
129	x	x	x	x	x	PERSON	BIRTH_DAY	DEFINITION		Date of birth, day
130	x	x	x	x	x	PERSON	BIRTH_LOCATION	DEFINITION		The lowest level of birth location is parish. Other geographical levels of birth location are defined elsewhere.

ID	DDB	SEDD	SWECEMS	ROTEMANNEN	SDB	TABLE	COLUMN	VALUE	VERSION	EXPLANATION

277	x					STILLBIRTH	STILLBIRTH_LOCATION_NAME	DEFINITION		Name of stillbirth location
278	x	x				STILLBIRTH	STILLBIRTH_MONTH	DEFINITION		Date of the event of a stillbirth, month
279	x	x				STILLBIRTH	STILLBIRTH_YEAR	DEFINITION		Date of the event of a stillbirth, year
280						TIMESTAMP	DATE_TYPE	Assigned		Date or period assigned by the database administrator
281						TIMESTAMP	DATE_TYPE	Declared		Date at which point in time a certain attribute is valid (like married or some occupational title)
282						TIMESTAMP	DATE_TYPE	DEFINITION		Type of date
283						TIMESTAMP	DATE_TYPE	Event		Date of an event, observed at the moment of the event itself (like the date of birth in a birth certificate)
284						TIMESTAMP	DATE_TYPE	Imputed		Date or period imputed by the database administrator, for example if at a certain date a divorce date is known it is possible to impute a period for CIVIL_STATUS is divorced.
285						TIMESTAMP	DATE_TYPE	Reported		Date of an event, reported in a later source (like the date of birth in a population register)
286						TIMESTAMP	ESTIMATION	Age_based		Period estimated on age and date at which the age is valid (eg calculating a period of birth on the basis of age given at date of marriage or death)
287						TIMESTAMP	ESTIMATION	DEFINITION		Type of estimation of date
288						TIMESTAMP	ESTIMATION	Estimated		The date is estimated
289						TIMESTAMP	ESTIMATION	Exact		Exact date (day, month and year)
290						TIMESTAMP	ESTIMATION	Interpolation		The period is a subperiod based on interpolation in equal parts within a broader period, the number of subperiods is equal to the number of different observations
291						TIMESTAMP	ESTIMATION	Month_year		Exact month and year (no day-number), no estimation made of the day-number
292						TIMESTAMP	ESTIMATION	Year		Exact year (no day- and month-number), no estimation made of the day- and month-number
293						TIMESTAMP	MISSING	Anonymized		A date is available in the database but for reasons of privacy not included in the IDS
294						TIMESTAMP	MISSING	DEFINITION		Reason why a date or a part of a date is missing (and had to be estimated)
295						TIMESTAMP	MISSING	Private		An (exact) date has never been entered into the database for reasons of privacy
296						TIMESTAMP	MISSING	Time_invariant		No date. Used for sex, birth_location, legitimacy, multiple birth, baptism_location, death_location, burial_location.
297						TIMESTAMP	MISSING	Unavailable		A date is missing in the source
298						TIMESTAMP	MISSING	Unknown		An (exact) date is missing in the source for reasons unknown (or not documented)
299						TIMESTAMP	MISSING	Unreadable		A date is unreadable in the source
300	x					VACCINATION	VACCINATION	Crossed out vaccination annotation		The listing contains a crossed out V, which can be interpreted as the attempt at vaccination failed. Sometimes the crossed out V is followed by an O, which can stand for unvaccinated. An crossed out V can also mean that the vaccination note itself is incorrect. In both cases, the person should not be immune to smallpox.
301	x					VACCINATION	VACCINATION	DEFINITION		Vaccination (smallpox).
302	x					VACCINATION	VACCINATION	Infected and revaccinated		This shows that the person is first infected by natural smallpox and then vaccinated (and re-vaccinated). This is impossible and cannot reflect the situation correctly. If a person has had smallpox, the person cannot be successfully vaccinated. One interpretation may be that the notation indicates that vaccination has failed (due to previous natural infection). Another interpretation may be that the first notation about previous infection proved to be incorrect, after which vaccination (and revaccination) has taken place.
303	x					VACCINATION	VACCINATION	Inoculated		The person is inoculated, not vaccinated.
304	x					VACCINATION	VACCINATION	Inoculated or vaccinated or natural smallpox		The person is either vaccinated, inoculated or has had natural smallpox. The reason why the different types are not separated is due to limitations in the system that previously have been used for registration the sources.
305	x					VACCINATION	VACCINATION	Natural smallpox		Means that the person has been infected with natural smallpox and is immune, therefore no vaccination or inoculation is needed.

ID	DDB	SEDD	SWECENS	ROTEMANNEN	SDB	TABLE	COLUMN	VALUE	VERSION	EXPLANATION
306	x					VACCINATION	VACCINATION	Natural smallpox (crossed out) and vaccinated		This code is similar to Natural smallpox and vaccinated, but the difference is that the annotation of natural smallpox has been crossed out. The reason may be that a person who previously had smallpox has been vaccinated. A more likely reason is that an earlier (and probably incorrect) notation of infection of natural smallpox has been changed to vaccinated, after vaccination has been made.
307	x					VACCINATION	VACCINATION	Natural smallpox and vaccinated		The person has had natural smallpox and is at the same time vaccinated. This is not normally possible. For persons born in the 18th century, the listing indicates natural smallpox, while those born in the 19th century are more likely to be vaccinated. However, in both cases immunity to smallpox has been obtained, but for those vaccinated only temporarily (10-20 years). It may also be that the person has been vaccinated and, at least 20 years, later infected with natural smallpox. That is when the immunity has disappeared.
308	x					VACCINATION	VACCINATION	Natural smallpox and vaccinated (crossed out)		The person has natural smallpox with the notation of vaccination crossed out. This may have meant that the person was vaccinated but later became infected. This may have been due to a long time between vaccination and infection (10-20 years), or alternatively that the vaccination did not work. It may also reflect that an attempt was made to vaccinate the person but failed, as the person had previously had natural smallpox.
309	x					VACCINATION	VACCINATION	Not vaccinated, no natural smallpox		The person is neither vaccinated nor has had natural smallpox. The person is not immune to smallpox.
310	x					VACCINATION	VACCINATION	Revaccinated and infected		This code indicates that the person is both vaccinated and re-vaccinated, as well as infected by natural smallpox. This is very unusual. One interpretation may be that this means that the person is simply vaccinated against smallpox, so that no natural infection has ever occurred. In all cases, this means that the person is immune to smallpox.
311	x					VACCINATION	VACCINATION	Uninspected vaccination		The vaccinators were obliged to visit the vaccinated persons after the vaccination took place. The code indicates that the person has not been checked after the vaccination, which is why we cannot say with certainty whether they are immune or not.
312	x					VACCINATION	VACCINATION	Uninterpretable vaccination annotation		The notation cannot be interpreted.
313	x					VACCINATION	VACCINATION	Unknown if vaccination has been performed		The notation indicate that it is not possible to say with certainty whether a vaccination has been made or not.
314	x					VACCINATION	VACCINATION	Vaccinated		The person is vaccinated.
315	x					VACCINATION	VACCINATION	Vaccinated and revaccinated		The person has undergone more than one vaccination, i.e. is revaccinated. The code indicates the strongest degree of immunity.
316	x					VACCINATION	VACCINATION	Vaccinated, not successful		This code indicates that the vaccination failed. People with this code were probably not immune to smallpox.
317	x					VACCINATION	VACCINATION_NR	N		N= serial number for vaccination of individual(1, 2, 3 etc)
